

OVERSEED (Winter Maintenance)

This program is designed to produce turfgrass of splendid color, great wear tolerance, and limited top growth. Nutrients and carbon sources will be beneficial to warm-season turf if temperatures favor its growth.

Foliar-Pak® Armament® P | 3 oz per 1,000 sq ft

Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

Foliar-Pak® Amperage | 3 oz per 1,000 sq ft

Sugars from natural molasses in Amperage energize plants and microbes with available carbon sources that stimulate biological activity. Amperage also provides an excellent color response and aids in thatch reduction.

Foliar-Pak® 1-0-15 | 3 oz per 1,000 sq ft

1-0-15 is made up of safe, reliable nutrients enhanced with a plant-derived L-amino acid package. It works to increase nutrient absorption and maximize plant nutrition through the use of low-dose applications. These L-amino acids work in various pathways to increase nutrient uptake and nutrient transport.

Foliar-Pak® Foundation Forty | 1 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.
