

WINTER/FALL ULTRADWARF (Soil)

This soil program is designed to deliver nutrients and unlock the nutrients that already exist in the soil to help prepare warm-season turf for the difficult winter weather. This well-rounded soil spray helps plants regulate water use, store energy, and build better cell wall structures.

Foliar-Pak® Armament® P | 1.5 – 3 oz per 1,000 sq ft

Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

Foliar-Pak® Armament® K | 1.5 – 3 oz per 1,000 sq ft

Potassium controls the translocation of carbohydrates and plant osmotic relations and is integral to protein synthesis. Armament K is formulated with long-chain carbon technology specifically designed to deliver potassium to plant roots.

Foliar-Pak® Colonise® Bio | 1.5 – 3 oz per 1,000 sq ft

Colonise Bio is a highly specific blend of live biology, carbon sources, and nutrient enhancers. It contains Armament, AminoPrecise®, and Colonise technologies to target better rooting, nutrient uptake, plant resilience, and turf playability.

Foliar-Pak® Base Calcium | 1.5 – 3 oz per 1,000 sq ft

Base Calcium is a highly concentrated calcium based on a proprietary dispersion and suspension process that includes polymers and sugars. It has the ability to displace sodium ions on the soil colloid, and also buffer salts that may be present in the root rhizosphere. Base Calcium helps to push the soil platelets apart, creating a more suitable environment for aeration and root growth.
