

ENHANCED COLOR

Looking for a color “pop”? You’ve come to the right program! This program provides nutrients and carbon sources specifically designed to enhance chlorophyll production and support the maximum function of that chlorophyll. It is centered around specific nutrients and amino acids that will provide consistent color through true plant health. If elevated color is the goal, this program will deliver without the adverse effects of a growth flush.

Foliar-Pak® Foundation Forty | 2 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

Foliar-Pak® Amperage | 3 oz per 1,000 sq ft

Sugars from natural molasses in Amperage energize plants and microbes with available carbon sources that stimulate biological activity. Amperage also provides an excellent color response and aids in thatch reduction.

Foliar-Pak® Magnesium | 1 oz per 1,000 sq ft

Magnesium uses specific amino acids to fully chelate the magnesium ion, which allows for maximum foliar entry into the plant.
