

## SUMMER ULTRADWARF

Build plant energy and maintain steady health during the heart of the warm season with this program. At a time when warm-season turf is at its prime, give your greens what they need to continue to facilitate good health. Nutrients and carbon sources are specific to building stronger plants to stand up to the demands of a myriad of stressors. Through this program your turf will build energy, stand up to traffic and salt stress, enhance color, and assimilate nitrogen and carbon to maintain healthy growth and recovery.

### **Foliar-Pak® Foundation Forty** | 1 - 2 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

### **Foliar-Pak® 18-3-4** | 2 - 3 oz per 1,000 sq ft

18-3-4 is made up of safe, reliable nutrients enhanced with a plant-derived L-amino acid package specific to increasing nitrogen fixation, chlorophyll and energy production. The L-amino nitrogen in 18-3-4 increases nutrient absorption and maximizes plant nutrition through the use of low dose applications. L-amino acids work in various pathways to increase nutrient uptake and nutrient transport.

### **Foliar-Pak® Amperage** | 1.5 - 3 oz per 1,000 sq ft

Sugars from natural molasses in Amperage energize plants and microbes with available carbon sources that stimulate biological activity. Amperage also provides an excellent color response and aids in thatch reduction.

### **Foliar-Pak® Magnesium** | 1 oz per 1,000 sq ft

Magnesium with AminoPrecise® uses specific amino acids to fully chelate the magnesium ion, which allows for maximum foliar entry into the plant.

## SUMMER ULTRADWARF

*Continued*

### **Foliar-Pak® Gold Standard 45** | 1 - 2 oz per 1,000 sq ft

Gold Standard 45 is a 45% phosphite product completely complexed with amino acids. By leveraging the strengths of amino acids, Gold Standard 45 is more water soluble than any of the current products on the market, allowing for a highly concentrated, low-use rate product.

### **Foliar-Pak® CSi L** | 1 - 2 oz per 1,000 sq ft

CSi L is one of the most concentrated liquid silicon products in the market at 25% SiO<sub>2</sub> by weight. It is derived from silicic acid, and forms a low molecular weight silica polymer.

*Optional Addition:*

### **Foliar-Pak® Calcium** | 1.5 - 3 oz per 1,000 sq ft

Calcium is a concentrated calcium product that is complexed by amino acids and other natural plant metabolites.
