

## TEE/FAIRWAY (Cool Season)

Give your tees and fairways what they need and deserve to get through the grind of the long golf season. This program addresses the complete needs of larger acreage through the use of cutting-edge technologies, like Foliar-Pak Armament®. Armament will work for you in the soil by helping to buffer and unlock the potential below the turf surface. Also included are micronutrients with a great chlorophyll pack that immediately provide color and create energy.

### Your Choice N Source | Desired rate

#### **Foliar-Pak® Armament® Concentrate** | 16 – 20 oz per A

Foliar-Pak Armament Concentrate contains Armament technology, our patented, biodegradable nutrient enhancer. Armament technology keeps nutrients in solution, preventing interactions in the spray tank and improving nutrient availability.

#### **Foliar-Pak® MicroSync** | 1 oz per 1,000 sq ft

Microsync is a well-balanced micronutrient package built with amino acids to enhance health, color, and stress tolerance in any turfgrass species. The premium nutrient chelators in Microsync improve uptake efficiency and compatibility with broadleaf herbicides. Iron and manganese in Microsync support chlorophyll production and photosynthesis, while the zinc plays important roles in root initiation and antioxidant production. The copper and manganese in Microsync work as enzyme activators in the process of building proteins and the boron is crucial for cell wall development because it provides structural linkages in cell walls.

#### **Foliar-Pak® Gold Standard 45** | 1 – 1.5 oz per 1,000 sq ft

Gold Standard 45 is a 45% phosphite product completely complexed with amino acids. By leveraging the strengths of amino acids, Gold Standard 45 is more water soluble than any of the current products on the market, allowing for a highly concentrated, low-use rate product.

#### *Optional Additions:*

#### **Foliar-Pak® Foundation Forty** | 0.5 oz per 1,000 sq ft

Foundation Forty is a highly concentrated blend of specific amino acids that increases plant energy, builds proteins, and improves carbohydrate storage. It also improves plant metabolism, especially photosynthesis, and enhances the uptake of other nutrients and spray tank additions.

#### **Foliar-Pak® Carbosential Fe Turbo** | 16 – 20 oz per 1,000 sq ft

Carbosential Fe Turbo yields outstanding residual color, increased nutrient uptake, and improved overall plant growth.

**MANUFACTURED BY:** ENP Investments, LLC • P.O. Box 618 • 2001 W. Main St. • Mendota, IL 61342 • Phone: 800.255.4906
